LOWER YOUR HEATING AND COOLING COSTS

Smart Thermostat Program

ENERGYWISESM
Use less. Spend less. Do more.

Most Nebraska homes use around half their energy for heating and cooling.

This includes all energies such as electricity, natural gas and propane. According to a Nebraska energy burden study, the average Nebraska household spends more than \$2,400 for the energy needed to run their home. What if you could reduce your heating and cooling needs by up to ten percent while helping to automate your home?

Now consider: The EnergyWiseSM Smart Thermostat Program. If you have a home Wi-Fi connection and a central air-conditioning or heat pump system, you may qualify for an EnergyWiseSM incentive of up to \$100 for installing a qualifying smart thermostat.

Smart thermostat technology is most beneficial for households that have extended periods during the day when no one is home, those that turn their thermostat down during bedtime hours or those that have irregular occupancy through the week, month or year.

- \$75 incentive is available for customers that use electricity as their primary heat source (add-on heat pumps included) in conjunction with their central forced air cooling system.
- \$25 incentive is available for customers that use fossil-fuel as their primary heat source in conjunction with their central forced air cooling system.
- An additional \$25 incentive is available for customers that have their thermostat professionally installed (documentation required).

Where do you start?

- Check with your local electric utility for eligibility. A list of eligible smart thermostats can be found at: www.energystar.gov/productfinder/product/certified-connected-thermostats/results.
- Confirm your home's HVAC system is compatible with the selected thermostat.
- Install the thermostat (professional installation is recommended) and ensure an operative Wi-Fi connection.
- Complete and submit incentive application with proof-of-purchase to your local electric utility. If professionally installed, submit copy of your contractor's invoice.

SMART THERMOSTAT APPLICATION FORM

Applications will only be processed if fully completed and signed. Once completed, return to your electric utility provider. Please address any questions with your local electric utility.

- Select One**
- \$100 - Primarily Electric Heat (Professionally Installed)
 - \$75 - Primarily Electric Heat (Customer Installed)
 - \$50 - Primarily Fossil-Fuel Heat (Professionally Installed)
 - \$25 - Primarily Fossil-Fuel Heat (Customer Installed)

1. Customer Information

Name: _____ Electric Utility: _____
Customer's Account Number: _____ Phone Number: _____
Customer's Address & City: _____
Installation Address & City: _____
Customer's Signature: _____ Date: _____
Print Name: _____

2. Thermostat Information:

Brand: _____ Model No: _____
Serial No: _____ Purchase Date: _____
Retailer Name: _____
Address & City: _____

3. HVAC Information: (Check one box in each column)

Primary Heating:

- Electric Forced-Air Furnace
- Air-source Heat Pump - electric backup
- Air-source Heat Pump - fossil fuel backup
- Geothermal Heat Pump
- Fossil Fuel Furnace
- Other _____

Primary Cooling:

- Heat Pump - Geothermal or Air-source
- Central Air-conditioner
- Other _____

4. Contractor Information: (Required for professional installation)

Name: _____ Phone Number: _____
Address & City: _____
Contractor's Signature: _____ Date: _____

Incentives valid with purchase and installation as of 1-1-2019. Subject to change without notice. Verify current incentive amounts and program information at www.nppd.com. These EnergyWiseSM programs are only available to customers of NPPD and customers of its wholesale utilities.
